Tata Boeing Aerospace Limited

(may, 2022 – sep, 2022)

Declaration

I hereby declare that the above-mentioned details are correct to the best of my knowledge.

Objective

An energetic unique thinker, eager to learn new technologies and willing to work in a challenging position with a growing organization where I can utilize my technical and interpersonal skills to serve the organization and enhance the same.

Professional Experience

Full Stack Developer | Hash Insert

Jan, 2023 – Present

- During my Internship at HashInsert, I gained hands-on experience especially in MERN stack web applications development and version control.
- Upskilled myself in designing secure RESTful APIs using Node.js and Express.js.
- Successfully completed multiple projects, actively participated in problem-solving activities.

Freelancing Project

Inventory Management Web Application - Houpd

- Collaborated with a team to deliver a robust inventory management website using Next.js, JavaScript, Supabase, and ChakraUI.

Projects

URL Shortener

- Created a user-friendly URL shortener app using ejs templates, Node.js, Express.js, and MongoDB. Implemented front-end interface and server-side logic.

Hash Market

- Created an e-commerce website called "Hash Market" using React. Designed and implemented a user-friendly interface to enable customers to browse and shop for products.

Certificates Management App

- Developed a secure and user-friendly web application called "Certificates Management App" using React.js, Express.js, Firebase, and Material UI for centralized storage and management of certificates and documents.
